AMENDMENTS

PLEASE AMEND THE CLAIMS AS INDICATED

1. (currently amended) A proxy server, communication system comprising:
a receiver configured to receive content from a service provider;
a storage device coupled to the receiver and configured to receive content
from a service provider and store the content; and
a transmitter coupled to the storage device, the transmitter being configured
to transmit at least a portion of the content stored in the storage device to at least
one compatible communication device so that the communication device can utilize
the content portion without requiring the communication device to store the content.
